

- Crazy Critter Tips**
- These soft toys should be kid friendly and kid safe – do not use buttons or wire ribbon that could choke or poke.
  - Select closely woven fabrics for best results.
  - Pattern uses  $\frac{1}{2}$ " seam allowances.
  - Complete all "fusibles" – eyes, nose, belly, heart prior to sewing parts together.
  - Embroidery can be added before or after body is sewn together.
  - Ears and tails do not require stuffing.
  - Baste ears in place and check placement before final sewing.
  - A chop stick or similar item comes in handy when stuffing.
  - Reinforce ears, arms, legs and tails so constant "pulling" won't pull them loose.
  - Use just enough stuffing to fill out the form making it smooshy rather than hard.
