

Clue #3

Step G

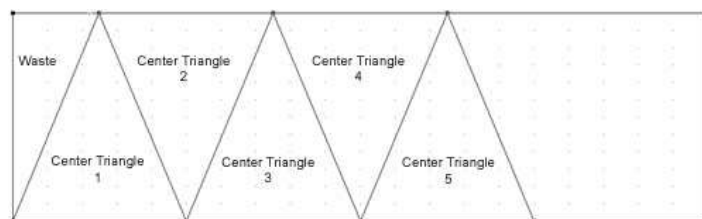

Select the following strips:

- 2 (1 ½) strips 6 ½” (4 ½”) x WOF **Focus**
- 2 (1 ½) strips 6 ½” (4 ½”) x WOF **Background**

Cut out the templates on the dotted lines for Center Triangle and Side Triangle.

Step H

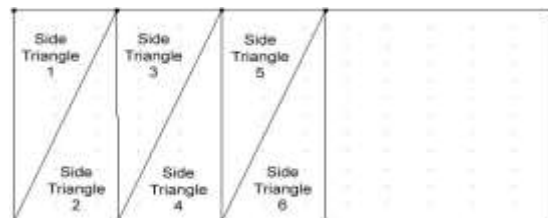

Take each strip of **Focus** fabric and fold in half lengthwise, right sides together. Using the Center Triangle template, cut out 10 triangles, alternating the direction of the template from point-up to point-down. You should now have 20 **Focus** Center Triangles.

Take each strip of **Background** fabric and fold in half lengthwise, right sides together. They must be right sides together to create left and right sides.

Note: To create the Triangle-In-a-Rectangle block, it is very important to sew a scant ¼” seam. If you have problems with doing this, you might want to make the straight side of the side triangles 1/8” larger, sew, press, and then trim to size.

Using the Side Triangle template, cut out 20 triangles, alternating the direction of the template from point-up to point-down. You should now have 20 **Background** Left Center Triangles and 20 **Background** Right Center Triangles.

Step I

Sew **Background** Left Side Triangle to **Focus** Center Triangle as shown in the figure. Make sure right sides are together! Press to the **Background** Side Triangle.

Sew **Background** Right Side Triangle to **Focus** Center Triangle as shown in the next figure. Make sure right sides are together! Press to the **Background** Side Triangle. Trim to 5” x 6 ½” (3 ½” x 4 ½”) if required.

You should now have 20 5” x 6 ½” (3 ½” x 4 ½”) Triangle-in-a-Rectangle blocks of **Focus/Background**.
